

**AUTO LOAD LOGIC IS A COMPLETE AND INTEGRATED AUTO TRANSPORT SOLUTION FOR SHIPPERS, BROKERS, AND CARRIERS.**

# THE CARRIER SOLUTION

**EASY. FAST. EFFICIENT. COST EFFECTIVE.**

**USE AUTO LOAD LOGIC TO AUTOMATE & SAVE**

**MOVE MORE VEHICLES, MORE EFFICIENTLY**

At Auto Load Logic, we understand that anything less than a full load is often unprofitable. Our patent pending loading algorithm identifies the best set of vehicles and loading configuration for your trip.

**1.**

We offer the only trailer loading algorithm in the used-vehicle transport industry. The OEM carriers have a lot of tools that have never been available to the used-car haulers. It's time that situation changed and ALL is here to do just that. Your load selection and load configuration problems are analyzed in seconds by our software, saving driver time and fuel burn, reducing your cost and increasing efficiency.

**2.**

Contracting, scheduling and vehicle inspections are all completed and managed online. All documents necessary to contract and move a vehicle are available on our site making it possible to complete transactions at midnight rather than making you wait until a broker's office is open.

**3.**

Your customers will know where their shipments are at all times with our real-time GPS tracking system. Imagine a day not filled with phone calls from shippers, brokers and customers asking where you are! From the time you scan the VIN number at pickup, to the time you scan it again at delivery, you can give your customer the ability to track their load without having to call you.

IT'S TIME TO RE THINK AUTO TRANSPORT.  
**EASY. FAST. EFFICIENT.**

**AUTO LOAD  
LOGIC**  
AUTO TRANSPORT REDEFINED

The ALL system is VIN based, eliminating the confusion created by other systems that rely on make, model and year. No more cases of double brokering of loads or double contracting.

How many disputes over vehicle condition could you avoid if you had an actual photo inspection to show vehicle condition at the time you pick it up? Our system incorporates photo inspections as well as e-signatures and electronic bills of lading.

How many loads do you miss because a broker doesn't know you're in the area of a load he needs moved? That's really a hit or miss process today! What if you could allow your trucks to be "seen" by brokers looking for carriers? So they wouldn't be just calling around at random. They'd actually know you were in the area. Filling available trailer space is what your business is all about, right?

Our mid-route searching system allows you to look ahead and find loads along your route. That helps you minimize empty spaces when you're dropping off loads mid-route and to decide if it's actually more profitable to start your trip with some empty space and fill it along the way.

**Want to provide a special benefit to a customer that you're shipping a vehicle to?** For a nominal charge you can provide your customer the ability to track the shipment themselves. Fewer calls that you'll have to answer! ALL is accessible on any size device: desktop, laptop, tablet or phone. Our mobile site and mobile apps are available on both iOS and Android platforms. There is no cost to register as an ALL user and no fees are charged until you actually contract to ship vehicles using the system.
